DETAILED ACTION

1. The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not).

Misnumbered claims 41-49 have been renumbered 43-51. Examiner suggests canceling original claims 41-42 as well.

2. Newly numbered claim 48 is objected to as it is dependent upon claim 20 which has been canceled. Clarification is required. Lastly, applicant has two claims 47 wherein the first claim 47 appears to be incomplete. Further clarification is required as well.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Newly numbered claims 49-51 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Tennler (GB 2052371)

Tennler shows a method comprising driving a pair of tools with a plurality of crank arms that are cantilevered transversely of the processing path as claimed for orbital

movement in a form, fill, seal operation. Tennler shows the use of two separate sets of tools working in combination with one another to expedite the manufacturing process. The passive devices are read on elements 18 which affect the position of the tool as elements 18 are pivot members.

5. Claims 43-48 are allowed.
